

# Samsung Galaxy S™ II

Delivering a faster entertainment experience on America's Largest 4G Network™, this sleek and stylish Samsung device will be one of T-Mobile's fastest smartphones, benefiting from HSPA+ 42 technology. The Galaxy S II lets you browse the Web faster than on the average home Internet and has shown average download speeds approaching 8 Mbps and peak speeds of over 22 Mbps on T-Mobile's 4G network.<sup>1</sup> Powered by a Qualcomm® Snapdragon™ S3 Processor with 1.5GHz dual CPUs and Android™ Gingerbread (2.3.5) platform, the Galaxy S II offers T-Mobile customers super speedy access to their favorite movies, TV shows, websites, games, applications and more.

Pairing rich entertainment features with a 4.52-inch Super AMOLED Plus touch screen—the largest screen available on a T-Mobile smartphone—the new Galaxy S II promises to be a hit with tech-savvy gadget-lovers keeping them entertained and connected while on-the-go. With the Galaxy S II, T-Mobile customers can stream favorite TV shows or movies on Netflix®, enjoy live or on-demand TV programs on T-Mobile® TV in mobile HD<sup>2</sup> or view a popular movie using Samsung Media Hub while its progressive download technology downloads the movie in the background. With DLNA compatibility and HDMI out, this media powerhouse also offers the ability to view content on a compatible HD TV.

Equipped with an 8-megapixel camera and full 1080p HD high profile video recorder, T-Mobile's Galaxy S II makes it easy to capture and share high quality photos and videos with family and friends or video chat while on-the-go via its 2-megapixel front-facing camera. The slim and sleek device (just 9.4mm thick), also features 16GB of on-board memory, expandable to 48GB with the addition of a 32GB microSD memory card, as well as a 1850 mAh lithium ion battery.

## Samsung Galaxy S II Key Features:
